The graph displays the daily death toll from COVID-19 in the United States. The y-axis is labeled 'Deaths per day' and ranges from 0 to 1000. The x-axis shows the timeline from March to January. A red dashed vertical line marks the date when the daily death toll reached 1000, which occurred in early August. The data points show a significant increase in deaths starting in June, peaking at 1000 deaths per day in early August, and then declining.
